TECH'S "WOMAN PROBLEM"

- more than just a pipeline issue

ABOUT IT PROFESSIONALS AUSTRALIA

IT Professionals Australia represents IT professionals across the full spectrum of industries and specialisations. Our members work in a wide variety of roles including IT trainers, IT sales, business and systems analysts, multimedia specialists, web developers, software and applications programmers, video game designers, database and systems administration, cybersecurity, IT support, test engineers, telecommunications and IT management as employees, via labour hire agencies and as contractors and consultants.

We have members who work across the finance, health, defence, education, infrastructure, mining and resources, manufacturing, agribusiness, law and cybersecurity industries who are specialists in artificial intelligence, video gaming, quantum computing, cryptography, robotics, blockchain, biometrics, wearable technologies, medical digital technologies, virtual reality technologies, analytics and data science.

IT Professionals Australia is a division of Professionals Australia (formerly the Association of Professional Engineers, Scientists and Managers, Australia) which is an organisation registered under the Fair Work Act 2009 representing over 25,000 Professional Engineers, Professional Scientists, Veterinarians, Architects, Pharmacists, Managers, Transport Industry Professionals, Translating and Interpreting Professionals as well as Information Technology Professionals throughout Australia. Professionals Australia is the only industrial association representing exclusively the industrial and professional interests of these groups.

Professionals Australia (2021).
